THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN AND JAMES D. DANA,

IN CONNECTION WITH

PROFESSORS ASA GRAY, LOUIS AGASSIZ, AND WOLCOTT GIBBS, OF CAMBRIDGE,

AND

PROFESSORS S. W. JOHNSON, GEO. J. BRUSH, AND H. A. NEWTON, OF NEW HAVEN.

SECOND SERIES.

VOL. XL.—[WHOLE NUMBER, XC.]

VOL. XL.—JULY—NOVEMBER, 1865.

WITH AN INDEX TO VOLS. XXXI–XL.

NEW HAVEN: EDITORS.
1865.

PRINTED BY E. HAYES, 426 CHAPEL ST.

CONTENTS OF VOLUME XL.

NUMBER CXVIII.

Page.

ART. I. On the Deep Placers of the South and Middle Yuba, Nevada county, California, in connection with the Middle Yuba and Eureka Lake Canal Companies; by B. SILLIMAN, 1

II. On the Ice in Kennebec River; by Rev. FREDERIC GARDNER, 20

III. On the Origin and Formation of Prairies; by L. LESQUEREUX, 23

IV. Preliminary notice of a small collection of Fossils found by Dr. Hays, on the west shore of Kennedy Channel, at the highest northern localities ever explored; by F. B. MEEK, 31

V. On the Replacement of one Alcoholic Radical by another in compounds of the Ether Class; by C. FRIEDEL and J. M. CRAFTS, - - - - - - - - - - 34

VI. On Etherification; by C. FRIEDEL and J. M. CRAFTS, - 40

VII. Contributions to the Chemistry of Natural Waters; by T. STERRY HUNT, - - - - - - - - - 43

VIII. On Molecular Physics; by Prof. W. A. NORTON, - - 61

IX. On the Spectra of some of the Fixed Stars; by WILLIAM HUGGINS, and Prof. W. A. MILLER: and On the Spectra of some of the Nebulæ; by WILLIAM HUGGINS, - - - 73

X. Reactions of Gelatine; by M. CAREY LEA, - - - 81

XI. Influence of Gravity on Magnetic Declination; by PLINY EARLE CHASE, - - - - - - - - - 83

XII. Researches on the Volatile Hydrocarbons; by C. M. WARREN, 89

XIII. On the nature of the Invisible Photographic Image; by M. CAREY LEA, - - - - - - - - - - 109

XIV. Mineralogical Notices; by Prof. C. U. SHEPARD, - - 110

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the chemical constitution of the brain, LIEBREICH, 113.—On an advantageous method of preparing oxygen, FLEITMANN, 114.—On propyl-phycit, CARIUS, 115.

Mineralogy and Geology.—Descriptions of New Species of Fossils from the Paleozoic Rocks of the Western States, by J. H. MCCHESNEY, 116 —Mont Alto Lignite and Appalachian Erosion, by J. P. LESLEY, 119.—Eruption of Etna: Volcano of Kilauea, 122. —Addition to Prof. Shepard's Notes on the minerals of the Emery mine at Chester, Mass.: Geological Map of Russia: On the changes rendered necessary in the Geological Map of South Africa, by recent discoveries of Fossils, by Dr. R. N RUBIDGE, 123. —Anthrakerpeton, a new Carboniferous Reptile, Prof. OWEN: Mineral wealth of Mexico, Baron de MORNER: Gneiss with the impression of an Equisetum: Kalicine, 124.—Geological Excursion, 125.

Botany and Zoology.—Thwaites, Enumeratio Plantarum Zeylaniæ; an Enumeration of Ceylon Plants, etc.: Flora Capensis, by Drs. HARVEY and SONDER, 125.—Thesaurus Capensis, by Prof. HARVEY: Ammobroma Sonoræ, or Sand-food of Sonora: Annales Botanices Systematicæ: The Production of Organisms in closed vessels, 126.—On the absorption and assimilation of carbonic acid by plants, BOUSSINGAULT: Classification of Polyps, by A. E. VERRILL, 127.—Embryology of the Star Fish; by ALEXANDER AGASSIZ, 129.

Astronomy.—Note on the inclination of the planetary orbits to the invariable plane, by Prof. G. HINRICHS, 131.—New Comet, 132.—Mr Huggins on the Spectrum of the Nebula in Orion, 133.—On the Meteorite of Mamboum, Bengal, by HAIDINGER: New Asteroid, 134.

Miscellaneous Scientific Intelligence.—Experiments on the production of cylinders of ice by pressure through orifices, by Mr. FRESCA, 134.—On Sepulture in the Age of Stone in France, by P. GERVAIS: Lake Habitations, 135.—On the Human Remains of the Trou du Frontal, by P. J. VAN BENEDEN and Dr. E. DUPONT: Instrument for measuring distances: On a Journey from Chimborazo to Bogota across the Central Andes, by ROBERT CROSS, 135.—Walker Prizes, Boston Society of Natural History, 137.—Tunnel of Mount Cenis: Centennial Celebration of the Royal Saxon Mining Academy at Frieberg: The Agassiz Expedition to South America, 138.—Report on the mortality in Paris, by M. DEVILLE: Dr. H. Falconer: Ink: Production of the Sexes: British Association: Academy of Sciences, Paris: Voyage of the Novara, 139.—*Obituary.*—Valenciennes: Pierre Gratiolet: Leon Dufour: Admiral Fitzroy: A. Gressly: Sir J. Richardson: Sir Joseph Paxton: Kupffer, 140.

Miscellaneous Bibliography.—A Treatise on Astronomy, by Prof. ELIAS LOOMIS, LL.D., 140.—Entomological Society of Philadelphia: Whitney's Report on the Geological Survey of California, 141.—A Preliminary Report on the Geology of New Brunswick, etc., by HENRY YOULE HIND, M.A., etc.: Ritter's Comparative Geography: Annual Report of the American Institute of the City of New York: Baird's Review of American Birds: Naturalist's Directory, by F. W. PUTNAM: Chambers's Encyclopedia: Report of the Commissioner of Agriculture for 1862, 142.—Report on the Formation of the Canterbury Plains (New Zealand), etc., by JULIUS HAAST, Ph.S., etc.; American Journal of Conchology, 143.—Notices of New Works and Proceedings of Societies, 143, 144.

NUMBER CXIX.

Page.

ART. XV. Friedrich Georg Wilhelm Struve, - - - - - 145

XVI. Experiments with the Ammonium Amalgam; by CHARLES M. WETHERILL, Ph.D., M.D., - - - - - - - - 160

XVII. Gravity and Magnetic Inclination; by PLINY EARLE CHASE, M.A., - - - - - - - - - - - 166

XVIII. Waterglass; by JOHN M. ORDWAY. Part V, - - 173

XIX. Speculations upon a possible method of determining the distance of certain variably colored Stars; by JOSEPH WHARTON, 190

XX. Contributions to the Chemistry of Natural Waters; by T. STERRY HUNT, - - - - - - - - - - 193

XXI. A new Meteorite from Newton county, Arkansas, containing on its surface Carbonate of Lime; by Prof. J. LAWRENCE SMITH, - - - - - - - - - - 213

XXII. Researches on the Volatile Hydrocarbons; by C. M. WARREN, - - - - - - - - - - - 216

XXIII. Barometer; by JAMES LEWIS, - - - - - - 233

XXIV. On a new Illuminator for Opaque objects under high powers of the Microscope; by H. L. SMITH, - - - 238

XXV. On a new Growing Slide for the Microscope; by H. L. SMITH, - - - - - - - - - - - 241

XXVI. On the Projection of the Spectra of the Metals; by Prof. JOSIAH P. COOKE, Jr., - - - - - - - - - 243

XXVII. On the use of the Bisulphate of Soda as a substitute for the Bisulphate of Potash in the decomposition of minerals, especially the Aluminous minerals; by Prof. J. LAWRENCE SMITH, - - - - - - - - - - - 248

XXVIII. Altitudes of Shooting Stars observed on the night of Nov. 13–14th, 1863, at Washington, Haverford College, Germantown, Philadelphia, and other places. Computed by H. A. NEWTON, - - - - - - - - - - 250

XXIX. Remarks on Gravitation, and its relation to a supposed Universal Force; by HENRY F. WALLING, - - - 254

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a new and very powerful thermo electric battery, S. MARCUS, 257.—On some thermo-electric elements of great electro motive power, STEFAN: On the wave length of the blue iridium line, J. MÜLLER, 259.—On the absorption spectrum of Didymium, Erbium and Terbium, DELAFONTAINE: Polisimmetria dei Cristalli; Relazioni tra la geminazione dei Cristalli ed il loro ingrandimento, par ARCANGELO SCACCHI, 260.—Memoire sur l'Emploi du Microscope polarisant, etc., par M. DESCLOIZEUX: Zirconium, 261.

Mineralogy and Geology.—On the Sand hills of Cape Henry in Virginia, by B. HENRY LATROBE, Esq, 261.—Volcanic Eruptions in Northern California and Oregon: Notice of Pot-holes near Poultney, Vermont, by JOHN A. NICHOLS, 264.—Observations on the Eocene Lignite Formation of the United States, by T. A. CONRAD, 265.—On the Fossil Insects from Illinois, the Miamia and Hemeristia, by SAMUEL H. SCUDDER, 268.—Paleontology of the Upper Missouri,—a Report upon collections made by the expeditions under Lieut G. K. Warren—Invertebrates, by F. B. MEEK and F. V. HAYDEN, M D.: Archæopteryx, 271.—Documents sur les tremblements de terre et les phenomènes volcaniques dans l'Archipel des Kouriles et au Kamtschatka, par M. ALEXIS PERREY: Extraits de Geologie, pour les années, 1862-1863, par M. DELESSE, 272.—Earthquake in the Mississippi Valley: Geological Survey of Nevada, 273.

Botany and Zoology.—The Tennessee Yellow Wood (Cladrastis lutea): Welwitschia mirabilis: On the Movements and Habits of Climbing Plants, by CHARLES DARWIN, 273.—Gradation from Individual Peculiarities to species in Insects, by Dr B D. WALSH, 282.—Illustrated Catalogue of the Museum of Comparative Zoology at Harvard College, 283.

Astronomy and Meteorology.—Shooting Stars seen at Hinsdale, Mass., in August, 1865: Shooting Stars seen at New Haven in August, 1865, 284.—Auroral Phenomena of August 3, 1865, 285.—Comparative intensity of the light reflected from the Moon and Venus, by Mr. CHACORNAC, 287.

Miscellaneous Scientific Intelligence.—Magnesium, 287.—The Rumford Premium: The Prince Albert Medal: Exploration of the Urals: Mineral Waters: Association for the Advancement of Science in France: Central Meteorological Bureau in Prussia: Goeppert on the Diamond, 283.—*Obituary.*—Silbermann: Dr. Samuel P. Woodward: Sir John William Lubbock: Sir William J. Hooker, 288.

Miscellaneous Bibliography.—A treatise on the Assaying of Lead, Copper, Silver, Gold and Mercury from the German of BODEMANN and KERL, translated by W. A. GOODYEAR: The Declaration of Students of the Natural and Physical Sciences: Smithsonian Report for 1863, 289.—Quartz Operator's Hand-Book, WHEELER & RANDALL, 290.—The Scientific Review and Journal of the Inventor's Institute: Coal Oils, GESNER: Tours of a Chess Knight, by S. S. HALDEMAN, 291—Notices of New Works and Proceedings of Societies, 291, 292.

NUMBER CXX.

Page.

ART. XXX. On the Origin of Prairies; by JAMES D. DANA, - 293

XXXI. On the Construction of a Spectroscope with a number of prisms, by which the angle of minimum deviation for any ray may be accurately measured and its position in the solar spectrum determined; by JOSIAH P. COOKE, Jr., - - 305

XXXII. Experiments in Mechanical Polarity; by PLINY EARLE CHASE, - - - - - - - - - - - - 313

XXXIII. Nitrates of Iron; by JOHN M. ORDWAY, - - - - 316

XXXIV. Some Indications of a Northward Transportation of Drift Materials in the Lower Peninsula of Michigan; by Prof. ALEXANDER WINCHELL, - - - - - - - 331

XXXV. On the Crystallization of Sulphur, and upon the Reaction between Sulphid of Hydrogen, Ammonia and Alcohol; by CHARLES M. WETHERILL, - - - - - - - - 338

XXXVI. On the History of Eozoön Canadense, (with a plate), - 344

XXXVII. Notices of Earthquakes, - - - - - - - 362

XXXVIII. On Metabrushite, Zeugite, Ornithite and other minerals of the Key of Sombrero; by ALEXIS A. JULIEN, - 367

XXXIX. On two Varieties of Sponge-Spicules; by ALEXIS A. JULIEN, - - - - - - - - - - - 379

XL. Researches on the Volatile Hydrocarbons; by C. M. WARREN, - - - - - - - - - - - 384

SCIENTIFIC INTELLIGENCE.

Iron regions of Arizona, by W. P. BLAKE: On an oil-well boring at Chicago, by GEO. A. SHUFELDT, Jr, 388.—On the Drift in Brazil, and on decomposed rocks under the Drift; from Prof. AGASSIZ—communicated by A. AGASSIZ, 389.—Mining Statistics of Great Britain for 1864, 390.—Cretaceous Reptiles of the United States, by JOSEPH LEIDY, M.D.: Note on the Discovery of Rhizopods in the Azoic, by JAMES D. DANA: Report on the Mines of New Mexico, by Prof. R. E. OWEN and E. T. COX, 391.—Defense des Colonies, by JOACHIM BARRANDE: Supplement to the Ichnology of New England, by EDWARD HITCHCOCK, D.D., etc.: New Dinosaurian from the Isle of Wight: Seaside Studies in Natural History, by ELIZABETH C. AGASSIZ and ALEXANDER AGASSIZ, 392.—Entomological Society of Philadelphia: A classification of Mollusca based on the principle of cephalization, by EDWARD S. MORSE: Natural History—A Manual of Zoology for Schools, etc., by SANBORN TENNEY, A.M. 393.—On a solar halo seen at Crawfordsville, Ind., by Prof. J. L. CAMPBELL, 394.—British Association at Birmingham:

Systema Naturæ of Linnæus: New Planet: Italian Society of Natural Sciences: Prof. Berthelot: Statue of Arago: Chambers's Encyclopedia, 395.—*Obituary.*—Admiral William Henry Smith: Hugh Cumming, 395.—Johann Franz Enke: William Rowan Hamilton: John T. Plummer, M.D., 396.

GENERAL INDEX TO VOLS. XXXI—XL, 397.

LIST OF PLATES, Vols. XXXI—XL, 435.

APPENDIX.—On Prairies: Discovery of a New Planet, by J. C. WATSON: Meteorites—System of Arrangement, by R. P. GREGG, 435.

ERRATUM.

P. 285, line 12 from top, for *C. Tomlinson, M.D.*, read *Mr. C. G. Stowell.*
